Professional Summary

Senior Business and Data Automation Analyst with 7+ years of experience optimizing business operations through advanced analytics, process maturity, and emerging AI technologies. Skilled in identifying inefficiencies, defining requirements, and delivering solutions that align with organizational goals. Engage closely with stakeholders, executive leadership, and technical teams to shape project strategy, manage risk, and drive successful outcomes.

Experience

Senior Business Analyst

June 2022 - Present

Areeva Solutions (Federal Contracting & Consulting) Remote, USA

Document Processing | AI Data Automation:

- Built the data foundation for document automation by consolidating 50K+ files of structured and unstructured data into a governed repository, designing the metadata, taxonomy, and version control standards.
- Engineered intelligent document processing pipelines combining OCR, LLM classification and validation rules, reaching 99%+ extraction accuracy and eliminating 20 hours of data entry and retrieval per week.

Business Intelligence | Reports & Dashboards:

- Automated ETL processes and owned the end-to-end lifecycle of multiple financial BI dashboards, delivering actionable insights that informed leadership decision-making.
- Identified AI automation opportunities across manual workflows, business use cases and providing generative AI solutions that reduced manual work and cost.

Software Optimization | Data Visualizations

- Managed software acquisition requests against IT governance, licensing, and asset management (CMDB) standards for a federal health agency's software portfolio.
- Performed data analysis to identify trends, patterns, anomalies, and opportunities, translating findings into visualizations.

Business Intelligence Analyst

S3 Shared Service Solutions (FinTech) Remote, USA

April 2024 - January 2026

Robotics Process Automation:

- Engaged with stakeholders and technical teams to identify opportunities using Robotic Process Automation (RPA), documenting requirements, validating automated workflows, and supporting digital transformation initiatives across financial operations.

Sprint Planning | UAT | Agile Project Management:

- Managed a high-volume backlog of system enhancement requests within Agile sprint cycles, leading UAT, sprint reviews, and authoring user stories to ensure deliverables met acceptance criteria.

Requirements Gathering | Documentation:

- Built a master data dictionary supporting 100+ business requirements documents, standardizing data element definitions and improving consistency across analysis, development, and testing.
- Developed user guides, job aids, quick reference guides and standard operating procedures for all supported tools and trackers

- Supported technology-enabled testing solutions by analyzing client needs and delivering end-to-end product configuration, training, and support.
- Partnered with business development teams to identify growth opportunities and strengthen client relationships.

EDUCATION

Stevenson University - Baltimore, Maryland	August 2015 - May 2019
Howard S. Brown School of Business and Leadership	
Bachelor of Science in Computer Information Systems	
Minor in Software Development	

CERTIFICATIONS

- [Certified Scrum Product Owner®](#)
- [Google Data Analytics](#)
